California Complete Count Census 2020 Implementation Plan Workshop (IPW) Public Summary

Red Bluff Community Center, Region 1
June 24, 2019

Implementation Plan Workshop (IPW) Purpose

The State’s 2020 Census outreach campaign, implemented by California Complete Count Census 2020, focuses on both the geographic areas and demographic populations who are “least likely to respond.” These areas and populations are commonly referred to as hard-to-count (HTC). The ultimate goal is to ensure that HTC/ least likely to respond communities and populations in California are accurately counted in the 2020 Census, thereby achieving the highest response rate possible for California.

The overall purpose of the IPW was for the California Complete Count staff and contractors to provide a general update, including strategic planning efforts, to reach the HTC. The morning session provided an overview and update for the public and contractors. During the afternoon session, the Census Office facilitated collaboration among contractors so that they could continue development an effective and efficient Implementation Plan (IP) to conduct outreach to the HTC populations. The IPs will provide a clear roadmap for contractors to conduct outreach to the HTC populations and serve as a tool to monitor progress and coordinate efforts.

California Complete Count thanks and acknowledges the County of Tehama for providing the venue and planning support for this meeting.

Summary of Morning Sessions

The morning session began with opening remarks from Laura Williams, Director of Social Services for the County of Tehama, Lee Salter, CA Complete Count Committee (CCCC) member, and Linda Cutler, Chief Executive Officer for the Sacramento Region Community Foundation. Each stressed the value of the census and the value of regional collaboration and partnerships.

Carlos Beltran, California Complete Count Census 2020 (CCC), provided an overview on the role of the state and its ongoing work to achieve a complete count. David Banuelos, United States Census Bureau (USCB) presented on the federal efforts and provided additional background on the U.S. Census.

Updates from Partners – Outreach Strategies

A panel comprised of contracted partners described their plans, strategies, programs and tools to be used for Census 2020 outreach. Panelists included:
Contracted partner’s Strategic Plans are currently under review. Panelists discussed their anticipated strategies for reaching out to Hard to Count (HTC) communities in Region One. They highlighted their existing local connections and stressed the value of leveraging community knowledge and relationships for census outreach efforts. Partners underscored the value of having data-driven, community-centered and asset focused outreach strategies that target HTC populations and the communities they live in. Partners discussed the importance of connecting with local community leaders and organizations to build upon the resources and established infrastructure in each county. They concluded by emphasizing the value of transparency and vulnerability as steps towards building trust with communities.

Gaps and needs identified by contracted partners included:

- Nonprofit capacity gaps
- Lack of broadband access
- Low response rates for tenants
- Reaching children 0 -5 years old
- The CCC does not have a robust system for translation and interpretation services. Working with community-based organizations (CBOs) can provide opportunities for filling the gaps for translation and interpretation.
- Written information cannot always be interpreted, so messages need to be communicated in other forms to accommodate low levels of English proficiency and varied literacy rates.
- Consistent messaging

Rural Approaches to a Complete Count

Yumi Sera, Regional Program Manager with CCC introduced the second portion of the morning session and highlighted the goal to dive into the region’s assets, barriers and potential approaches for ensuring a complete count. The discussion was facilitated in the context of the following questions:

1. What is one key idea, image or point you heard in the partner presentations?
   - Challenges
     - Language should be considered more extensively when planning outreach
     - Lack of P.O. boxes
     - People living off the grid
     - Limited broadband access
     - Transportation
     - Mistrust of the government
     - Communities with gaps between elderly and younger generations are a challenge since youth do not always speak the language of the elderly.
   - Opportunities
     - Develop multiple access points for technology, which is multifaceted and adaptable for reaching different populations.
     - Organize gatherings that communicate the importance of the census.
2. How do these points relate to the rural communities where you live?

- Challenges
  - Older communities such as those affected by fires have no broadband access
  - Many displaced by fires are hard to track
  - No access due to locked gates on properties
  - People do not want to engage or participate
  - Undocumented community may be resistant to being counted
  - Farm owners may tell undocumented workers not to participate in Census 2020
  - Homeless population’s data may be difficult to capture
  - Residents unable to get access codes for census

- Opportunities
  - Connect with the Fire Department or voter registration to find addresses

Participants discussed the following questions in small groups:

1. In your communities, what assets, barriers, or opportunities will affect your outreach?
2. What are outreach approaches to address the situation you’ve described?

Participants highlighted general ideas and strategies related to the above questions then focused in on the issues of homelessness, displacement and post office boxes during the report out:

Potential Messaging Strategies

- Connect personal interests and day to day impacts to the census

Potential Outreach Tactics

- Post signage in local stores
- Use 211 as a translation resource
- Send translated mailers and other media messages
- Use text messaging
- Expand transportation opportunities
- Leverage the following sites for QAC’s:
  - Libraries
  - Senior centers
  - Grocery stores
  - Family and other resource centers that already engage with HTC communities

Potential Outreach Partners

- Faith Based Organizations (FBOs)
- CBOs
- Younger generation
- Landlords
- First 5
- Department of Education

Homelessness and Displacement
• Message via point and time throughout counties
• Review FEMA temporary housing
• Utilize mobile technology
• Utilize maps
• Invite people experiencing homelessness to breakfast at centers to discuss Census
• Partner with homeless consortium
• Work with agencies that already serve specific HTC populations

Alternatives to P.O. boxes
• Connect with local Fire Departments for addresses
• Leave mailers in P.O. boxes
• Use municipal service billings
• Use voter information
• Access county records on property information

Summary of Afternoon Session

Activating the Region from Strategy to Implementation

Emilio Vaca, CCC Central California Regional Program Manager, acknowledged counties were at different stages of their planning processes. Some counties have submitted strategic plans and other counties are working to complete theirs. Mr. Vaca encouraged counties to utilize Statewide Outreach and Rapid Deployment platform (SwORD) as a guide to focus their outreach efforts. He emphasized CCC’s role to support counties with strengthening their strategic plans.

SwORD Discussion

Questions and comments by partners during overview of SwORD:

• How do we sign-up to access SwORD?
  o Complete a ticket and ask for a new account; set-up typically takes 24 hours.
• Will SwORD allow users to narrow down mapping to a certain time frame for specific regions?
  o Yes.
• What does clean data look like?
  o The State will validate the data collected and make sure the block groups are correct. Everything shown on SwORD is aggregated by block group. The state will not have personal information such as addresses.
• Can information be shared with CBOs not involved in represented partnerships established by the ACBO or CCC? Is there a way to connect them to regions across the State?
  o They should submit a ticket to request an account and mention the sponsoring ACBO or county.
• If an organization is doing something effective or helpful how will that be shared?
  o CCC can help facilitate conversations between different users. Also, CCC sends out regular update emails to counties, CBO’s and other SwORD users. In addition, SwORD includes a “What’s New” page.
• Please expand on the outreach reporting, the PDI (Political Data, Inc.) app and the online form for submitting data.
PDI is an app that the state will be providing to partners to assist them with household canvassing and other outreach activities. There are other 3rd party apps, as well.

In summary, to get completed outreach activity data to the state, SwORD users have three main options: completing the outreach reporting web form; filing a ticket to submit the census outreach data bulk upload using an Excel worksheet; or using PDI or another 3rd party application that connects to the state census’ office application programming interface (API) service.

- Is there a cost to using PDI?
  - Not for partners.

**Group Discussions**

Participants were next split into two groups: contracted county partners and Funding Consortium Partners (FCPs). The major theme from the group discussions was that partners need clarity on the roles of the ACBOs, counties and Funding Consortium Partners to strengthen their strategic planning, identify gaps and create opportunities for collaboration.

**Contracted County Partners** expressed the following needs:

- Understanding the difference between strategic plans and implementation plans
- Networking opportunities
- Guidance on what is expected for implementation plans
- Coordination with local efforts to add value and support to existing work
- Public Relations support
- Provide branded tools and media toolkits that can be customized based on the community
- Messaging that highlights tested messaging is crucial
- Establish a robust center for people with disabilities
- Interested in hearing more on ways to collaborate with ACBO and seeing more information pertaining to funding.
- Plans need to factor in weather conditions during enumeration. Some counties may still have snowfall. Consider how work can be done in advance.

The group received a strategy worksheet for opted-out counties. The ACBO will provide a work plan with responsibilities and approaches and will follow up with framework development.

**Funding Consortium Partners (FCP’s) discussion:**

- The ACBO will be in touch with Funding Consortium Partners (FCPs). If a county wants to form a CCC, the ACBO can walk you through the process to form one, understanding that each county is different. They will find an approach that works for you.
- Siskiyou-Shasta Region Community Foundation can help form a CCC.
- CBOs in opt-out counties can still receive funds thru FCPs.
- FCPs can also help areas with gap coverage and connect them with tools and outreach strategies. Go to them for answers on how to become involved.
- Regular gatherings of CBO’s and funding partners will occur in the future.
- FCPs would like access to a project manager.
Community Foundations have signed contracts, completed their strategic plans and now await funding. They are waiting for direction on any required quarterly reports and implementation plans.

**Next Steps**

- USCB is creating a list of outreach events they will put on throughout the state
- Participants are invited to attend SwORD training sessions.

Sue Woods asked participants to express their current or anticipated needs following the information presented throughout the Implementation Planning Workshop.

Participants highlighted the following needs:

- Direction from the state on what is and is not eligible to be purchased as outreach incentives.
- Need timeline on milestones as guidance for counties
- Provide a matrix that illustrates types of funding counties receive related to census and showing how ACBO plans to use funding
- Translation services for outreach

**Summary of IPW Evaluation Results**

- Seven participants turned in meeting evaluations. Components of the workshop were ranked mostly Good (4) with some Excellent (5) and some Average rankings (3)
- Components participants found the most helpful included:
  - Sharing challenges and ideas on outreach and implementation strategies
  - Overview of planning goals, structure, timelines, approaches and barriers
  - Meeting the ACBO representative
  - Understanding the levels of involvement and how funding/resources are allocated
  - Learning about materials for Census 2020
- Additional information that would be useful and/or interesting:
  - More information on funding allocations and its sources
  - More information on timelines and milestones
  - List of county connections and resources
  - In-depth step by step tools for implementation for CBOs
  - Give more time to ACBO to explain their process
  - How outreach strategies are or are not working
- Suggestions to improve the program:
  - Provide snacks and drinks
  - Introductions from everyone in the room
  - Make a note of questions that are difficult to answer and e-mail answers later
  - Hand out agreed upon language, definitions and meaning of acronyms
  - More table discussions and report out
  - Provide power point copies and links to the power point online

California Complete Count Census 2020 Convening & Implementation Plan Workshop
Red Bluff Community Center
1500 S. Jackson St., Red Bluff, California
Monday, June 24, 2019

CALIFORNIA COMPLETE COUNT CENSUS 2020

The State’s 2020 Census outreach campaign will focus on both the geographic areas and demographic populations who are “least likely to respond.” These areas and populations are commonly referred to as hard-to-count (HTC). The ultimate goal is to ensure that HTC/least likely to respond communities and populations in California are accurately counted in the 2020 Census, thereby achieving the highest response rate possible for California.

WORKSHOP PURPOSE

The overall purpose of the Implementation Plan Workshop (IPW) is for the Census Office and contractors to provide a general update, including strategic planning efforts to reach the HTC. The morning session will be an overview and update for the public and contractors. During the afternoon session, the Census Office will facilitate collaboration among contractors so that they can develop effective and efficient Implementation Plans to conduct outreach to the HTC populations. The workshops are being held in locations across the state between June and September 2019. The Implementation Plans, due in the Fall of 2019, will provide a clear roadmap for contractors to conduct outreach to the HTC populations and serve as a tool to monitor progress and coordinate efforts.

OUTCOMES

The primary expected outcomes of the workshop are for Census and contractors to share information and progress on their outreach approaches, so that they can:
1) Identify gaps and good practices to learn from one another and create synergies
2) Coordinate expertise and resources to ensure efficiency and relevance to the hard-to-count population
3) Develop next steps to finalize the implementation plan, including the language and communication access component, and coordination of outreach

AUDIENCE

The primary audiences for the full day are contractors, which include: local governments, Administrative Community-Based Organizations (ACBOs), Statewide Community-Based Organizations, Tribal Governments, and subcontractors. Other invited participants include elected officials, Local Complete Count Committee members, California Complete Count members, and education and sector partners. The participating counties are Colusa, Modoc, Nevada, Shasta, Sutter, Tehama, and Yuba. The opt-out counties’ outreach will be conducted by the ACBO and their partners; these counties are: Butte, Glenn, Lassen, Plumas, Sierra, and Siskiyou.

ACKNOWLEDGEMENTS & INFORMATION

Thank you to the Tehama County for providing the venue and support for planning.
Please contact Yumi Sera yumi.sera@census.ca.gov (916) 200-5617 for more information.
