

California Complete Count – Census 2020 Region 3 Snapshot

The Bay Area region is known for its dynamic mix of urban and suburban enclaves, high-tech and low-tech employment centers, arts and entertainment production, and ethnic cultural centers. While these diverse characteristics are a strength, the region's population includes those who are hard-to-count. The Bay Area's vibrant diversity and ethnic cultural centers pose significant challenges to a complete count, as over 2.75 million people speak a language other than English at home. Adding to this complexity is the high cost of housing that has led to an increased number of those experiencing homelessness and displacement; a high percentage of renter-occupied neighborhoods;

and high percentages of low literacy, foreign-born residents, and low/no broadband access. The map above displays the Hard-to-Count (CA-HTC) Index based on multiple demographic, housing and socioeconomic variables that correlate to an area that is difficult to enumerate. Census tracts with a higher CA-HTC index are likely to pose significant challenges to count in 2020, while tracts with lower indexes should be easier.

The Region 3 ACBO, United Way Bay Area (UWBA), will work to ensure sufficient coverage in under-resourced counties and cities throughout the seven Region 3 counties. Specifically, Marin, Contra Costa, Solano and San Mateo counties have received fewer state resources and pockets of these counties also have fewer available CBOs involved in Census outreach. UWBA's plan includes three main components of coordination: collaboration with other regional census leaders, frequent communication, and partnerships with subcontractors as local and trusted community messengers.
