Narrative Report

1) List your goal(s) and objectives as it appears in your strategic and implementation plan. What and how did you revise the objectives due to COVID-19 and the US Census Bureau’s operational adjustments?

(From Strategic Plan as submitted)
Goal: Remove barriers and make sure every San Francisco resident is informed, engaged and motivated to participate and be counted in the 2020 Census. OCEIA has identified three focus areas for ensuring San Francisco is counted in the 2020 Census:

- Increasing accessibility
- Fostering trust
- Motivating SF Residents

San Francisco’s SF Counts strategies for the 2020 Census relied heavily on the successful, grassroots community-driven mobilization efforts utilized in the 2010 Census. These strategies were developed to reach and motivate one of the largest and hardest-to-count populations in the nation. Self-response for the 2020 Census began on March 12, 2020, just four days before the COVID-19 global pandemic hit the Bay Area and San Francisco Mayor London Breed implemented one of the country’s strictest shelter-in-place orders (SIP). The City and its community partners

Due Date: November 16, 2020
had to quickly pivot and implement non-contact, safe distancing, and virtual outreach for the majority of the census effort.

The shelter-in-place order has remained in effect in some capacity since March 17. Fortunately, the City’s swift and decisive response minimized community spread and saved lives. Unfortunately, COVID-19 had a significant effect on San Francisco’s census operations and outreach.

While the goal and focus areas remained the same throughout the 2020 Census, the City and County of San Francisco, the Complete Count Committee and census grantee partners had to make significant adjustments to operations and outreach to comply with mandatory public health orders. Generally, San Francisco had planned the best use of the City’s dense population and its civic spaces, such San Francisco Public Library neighborhood branches, large community events, and Sunday Streets gatherings, for census engagement and assistance. However, COVID-19 prompted a comprehensive rethinking of all outreach strategies.

2) Reflecting on your own operations and outreach strategies throughout the campaign, please provide a response with specific examples for the following questions. Please also indicate which timeframe you are referring to in your response (i.e., education, NRFU period).

**Contracted partner’s operations**

**What worked well operationally?**

**Coordination between the City and contracted community partners**

Throughout the census effort, the City met regularly with grantees, providing guidance, tools, resources, peer experts, and space to discuss approaches that were working or that needed to be revised.

**Best practice sharing between counties and with UWBA**

Weekly calls with Region 3 Counties and the region’s ACBO, the United Way of the Bay Area, were valuable. In particular, UWBA shared valuable data analysis each week that helped to understand progress and problem areas, and it was helpful to hear what strategies and tactics had been successful (or not) in neighboring counties.

**Real-time data to target response**

The up-to-date information provided daily by tract by the U.S. Census Bureau allowed the City and County of San Francisco to both target and tailor census outreach efforts as well as communicate effectively with internal stakeholders, such as lawmakers, about response progress across the City and County.

**OCEIA Community Ambassador Program and Language Access Unit**

OCEIA operates the Community Ambassador Program, a safety and engagement job training program. Multilingual teams of Ambassadors work every weekday to engage and inform residents, workers and visitors while acting as a safety presence in major transit and busy public corridors. Work continuity for program participants
City and County of San Francisco

has been a priority throughout the pandemic, and Ambassadors were able to turn to census engagement as a valuable way to engage the community. Ambassadors phone banked from home during the shelter in place order and, in the final weeks of the census, also did vital mobile questionnaire assistance in their regular work neighborhoods and for unhoused San Francisco residents. While the Community Ambassador Program was always a planned component of the SF COUNTS effort, the work and impact of the Ambassadors exceeded expectations.

OCEIA’s Language Access Unit (LAU), an in-house team of language specialists were able to quickly translate materials in multiple languages and help customize language nuances for different language populations.

Support from the State of California CCC and Census Team Leadership
Even with COVID-19 challenges, the local Area Manager and Director were always accessible, approachable and supportive.

What hindered the operations?

Constant shifting in USCB timelines and operations
Planning SF COUNTS community outreach was very challenging because of frequent changes to the U.S. Census Bureau’s timelines and operations, as well as late notice about these changes. Staff also spent considerable time addressing multiple, duplicative Census Bureau requests for training and operations space, further diminishing the City’s ability to execute its own plan.

Need to operate virtually/remotely without warning/preparation
Like many units of local government, OCEIA was accustomed to working together in person and using technology that is not immediately accessible outside of workplace-based computer terminals. It was challenging to build and provision for a remote operation without having planned for such operations in advance.

Contracted partner’s outreach
What outreach tactics worked well?

Customized social media and messaging
The SF COUNTS social media campaign was implemented in multiple phases, moving from census awareness building to motivational calls to action and participation. The social media strategy was built around a recognizable visual brand that was culturally competent, multilingual, and easily customizable for community and city partners to utilize.

SF COUNTS social media visual assets were optimized for Facebook, Twitter and Instagram posts. Visuals were dynamic and people-focused, including images of diverse faces, families, and represented hard-to-count communities. All messaging was available in four languages (English, Spanish, Chinese, Tagalog), with printed assets in 10 additional languages.
Each phase of the social media strategy shared these assets in an easy-to-navigate Social Media Toolkit Google Document and Dropbox. In addition to social media collateral, these toolkits included other related resources such as email newsletter blurbs, shareable videos, downloadable census coloring book pages, video PSAs from City and community leaders, and much more.

During the Self-Response period of the census, the SF COUNTS social media campaign one or more engaging census posts a day on OCEIA’s multiple platforms (Facebook, Twitter and Instagram.) Additionally, the campaign participated in local, state and national census campaigns and days of action, such as Black Census Week, CA Census Weeks of Action, and many more.

OCEIA / SF COUNTS social accounts:
Facebook facebook.com/sfgov.oceia,
Twitter: @OCEIA_SF
Instagram: @sf_immigrants
YouTube: www.youtube.com/channel/UCzSSy5R96IVV7ffm12r3STA

Art+Action “Come to your Census” campaign
OCEIA engaged local arts-based partner Art+Action to create a unique, vibrant campaign for the census. This work featured and lifted the work of 70 local artists in the only arts-based census campaign nationwide, using local and indigenous artists to create images that reflected the people and cultures of San Francisco. The art and messaging were featured throughout the city on billboards, bus shelters, light pole flags, a mobile billboard truck, and on walls and other public spaces.

Materials pickup available, including Personal Protective Equipment (PPE)
Throughout the education phase, self-response and NRFU, SF COUNTS continued to make multilingual census materials available for pickup by community partners. Materials distributed included posters, postcards, t-shirts, and giveaways as well as PPE, such as census-branded face masks (5,000 procured in partnership with Alameda County and 20,000 created by Art+Action) and State of California-provided hand sanitizer and gloves.

In-person canvassing and MQA
Throughout the census and especially during the final month, as San Francisco’s COVID situation improved, SF COUNTS and its partners conducted in-person canvassing and mobile questionnaire assistance. This included visits to public housing sites, safe sleeping sites for unhoused residents, and physically-distant COVID-safe outdoor events to promote and enable census response.

Phone banking
Throughout the self-response period, SF COUNTS facilitated phone banking for Census Grantees and other volunteer groups. Supported by United Way of the Bay Area, SF COUNTS used PDI to generate call lists in targeted low-responding neighborhoods. In the final weeks of the self-response period, SF COUNTS also used CallHub to phone bank more efficiently.
COVID-safe visibility efforts, including caravans and bus tours
During the census self-response period, SF COUNTS Census Grantees conducted a car caravan that visited the Mission and Excelsior Districts of San Francisco. In addition, the San Francisco Complete Count Committee conducted two bus tour/caravan events: during the first event, OCEIA grantees across six hardest-to-count, low self-response neighborhoods hosted caravan stops ahead of a press conference at Portsmouth Square; during the second event, members of the SFCCC drove through all 11 supervisorial districts ending with a vigorous a City Hall rally.

What hindered the outreach?
Clearly the inability to conduct in-person assistance, community events and large group gatherings was the major outreach obstacle. Additionally, for diverse, urban areas like San Francisco, Los Angeles and New York City, outreach was challenging due to the exodus of many renters, students and families who either could no longer afford living in a high-cost City or had the ability to shelter in place outside of the City. Vacancy rates in San Francisco were estimated to be 20% during the campaign period.

3) Describe challenges and changes occurring outside or within your organization / agency that had an impact on the outreach work. Describe how you responded to these changes to work toward achieving a complete count.

The onset of the COVID-19 pandemic was the primary challenge to outreach work. The pandemic threw the U.S. Census Bureau timeline into disarray. It prompted public health measures that made person-to-person outreach challenging or impossible for much of the census self-response period. And it made planned awareness efforts, such as outdoor advertising, far less effective as residents sheltered-in-place.

Ultimately, the early ending of the extended timeline reduced San Francisco’s ability to conduct outreach during the pandemic. Staffing and resources that originally covered up to July 2020 were scarce in the last three months (August through October). In addition, several grantees were not able to continue census outreach past the end of July, the original end date of the census, due to reduced capacity, COVID-19 impacts, and shifting organizational priorities.

4) For county and ACBO partners, what was the county (or region’s) 2010 response rate and what was the 2020 response rate? If the response rate met and exceeded the 2010 response rate, what contributed to that? If it did not meet the 2010 response rate, what were some of the challenges for that? For other partners, please note what data you used and how you used data for your strategies.

For the City and County of San Francisco, the 2010 Self-Response rate was 68.6% (overall Mail Participation Rate 72%); in 2020, the Self-Response rate as of October 15 was 66.9%, a difference of 1.7%. We believe that the City’s final self-response rate will increase after the U.S. Census Bureau removes a significant number of vacant
housing units from the total enumeration universe and adds non-ID/no address responses to the final count. The slightly lower self-response rate is attributable to several factors:

a. Significant disruption to planned operations and outreach due to COVID-19
b. Changes to the city’s population because of the COVID-19 pandemic and its economic impacts and high out-migration of renters, students and families.
c. Dramatically reduced NRFU operations by the US Census Bureau, including no visits to any tract with a self-response rate greater than 49% and only one mandated household visit prior to marking a property vacant (versus the planned and previously used up to six visits)
d. Public protests and deepened distrust in government due to a pattern of unjust and racially-motivated police brutality, including the killings of George Floyd and Breonna Taylor.
e. The chilling effect of anti-immigrant rhetoric by Trump Administration officials including an Executive Order from the President to exclude undocumented immigrants from the apportionment count
f. Confusion among residents about how to respond to the census circumstances, for example, for college students with a San Francisco address who had returned home during shelter in place.

5) Please describe the process and results of your partnership coordination and how it educated and motivated the hard-to-count populations to complete the Census questionnaire.

OCEIA made grants totaling $2 million to 32 community-based organizations (“Census Grantees”) that reached into hard-to-count populations to promote census awareness and engagement. Of these, 11 grants were funded by the State of California: SF Rising, A. Philip Randolph Institute (APRI), Chinatown YMCA, Good Samaritan Family Resource Center, Japantown Task Force, Northeast Medical Services, Self-Help for the Elderly, SF Labor Council, South of Market Community Action Network, Southeast Asian Community Center and Wu Yee Children’s Services.

Census Grantees pursued a range of strategies to support a complete and inclusive census count. For example:

- Education
- Self-response
- NRFU
- Tabling
- Outreach events
- Phone banking
- Digital census assistance
Each of the non-profit grantees had a special focus on one or more of the hard to count communities in San Francisco. Not only were these organizations trusted by residents belonging to their respective communities, they were also able to provide census education and assistance in a culturally and linguistically competent manner. Employees of these agencies reflected the communities served and were able to relate to and identify with the challenges of hard to count communities face and were the best suited to ensuring participation and motivating people in low responding areas.

Close coordination between the City through the Office of Civic Engagement & Immigrant Affairs, the SF Complete Count Committee and community partners was at the heart of this effort. SFCCC leadership through Co-Chairs Anni Chung and Andrea Shorter was superior, The City met regularly with grantees and committee members to provide guidance, tools, resources, peer experts, and space to discuss approaches that were working or that needed to be revised.

6) Please provide a list of key partners and describe their contributions of how they made a difference in your outreach efforts.

San Francisco awarded 32 community grants in total using the City and State of California’s investments. Key grantee partners funded by the State of California include a number of broad coalitions and individual organizations:

A. Philip Randolph Institute, Alive & Free, Chinese for Affirmative Action (Hard-to-Count), Chinese Progressive Association (SF Rising), Community Youth Center (API Council), Filipino American Development Foundation (SOMCAN), Good Samaritan Family Resource Center, Independent Arts & Media (Code Tenderloin), Japanese Community Youth Council (Japantown Task Force), Mission Neighborhood Center (SF Latino Parity & Equity Coalition), North East Medical Services, Self-Help for the Elderly, SFCLOUT, Southeast Asian Community Center, Wu Yee Children's Services, YMCA of San Francisco.

Their contributions are listed below:

- Provided census education for monolingual and limited English proficient residents as well as those with native language literacy challenges.
- Provided census education and access to digital technology for those who are unable to use a computer or do not have access to one.
- Provided culturally competent outreach to San Francisco’s hard to count populations.
- Conducted Census outreach in safe sleeping sites for unhoused people.
- Conducted Census outreach at grocery and diaper distribution sites.
- Conducted census outreach in churches and shelters.
- Tabled at high traffic public areas and at outdoor fairs.
- Tabled at community centers, schools and other community focused events.
City and County of San Francisco

- Distributed flyers and posters in low responding areas.
- Organized census phone banking to client base and low responding areas.
- Engaged in social media outreach to low responding areas and websites frequented by hard to count users.
- Gave interviews to, put ads in and created articles for ethnic media news sources including television, radio and newspapers.

The outreach described here represents only a portion of the census work done by the City and County of San Francisco. As mentioned previously, 32 community-based organizations, including five large citywide coalitions with a network of over 200 organizations, were funded to provide census education and outreach to hard-to-count communities. OCEIA also engaged in census partnerships with other city departments, media, religious organizations, and other key stakeholders throughout the county.

7) Please describe how you provided accessible and in-language outreach activities, including how you ensured equal and meaningful access to limited English proficient individuals and people with disabilities?

Language Access
Subject to the City and County of San Francisco’s Language Access Ordinance, all materials created by the City for the 2020 Census were made available in English, Spanish, Cantonese/Mandarin and Filipino. Many of our materials were also available in Russian, Arabic, Persian, Hindi, Japanese, Khmer, Korean, Samoan, Thai and Vietnamese. This included printed materials, social media assets, digital media communications and messaging, as well as live translation support at census events. The City’s Language Access Unit, housed within OCEIA, also translated census materials and information for the Region 3 ACBO, the United Way of the Bay Area.

Grantees
Cumulatively, our grantees have language capacities in all languages mentioned in the previous paragraph. Each grantee organization focused on providing services in the language appropriate for the community they worked with. Grantees often partnered together during outreach to ensure that education could be conducted in the area’s most common languages.

Many of our grantee organizations specialize in outreach to low income, unhoused and senior residents, who statistically have higher rates of disability than the general population. Additionally, all outreach events were held in locations that were wheelchair accessible and every effort was made to ensure indoor sites were accessible per the ADA’s recommendations.

Accessibility
The City’s SF COUNTS teams partnered closely with the Mayor’s Office on Disability, disability rights networks, and the Department of Aging and Adult Services (DAAS). Multiple presentations were made to the advisory and other network groups of
nonprofits that serve the disability community in San Francisco. In addition, the City provided a grant to Senior Disability Action and other organizations to coordinate outreach.

While in-person outreach was largely impossible because of public health restrictions during the self-response period, the City’s Census Week of Action did include census assistance events. These were all accessible and participants included many individuals with physical disabilities.

8) Please share a story(s) of how your work has made a difference to Census 2020 and the impact on the community. Please include images and quotes, so we are able to understand the narrative behind the numbers.

Impact stories:

1) In August, in partnership with a neighboring housing development, OCEIA’s staff participated in a backpack giveaway. Community members were encouraged to participate in the 2020 Census after they received their backpack. A mother of three came to the event because she recently lost everything in a fire. One of her daughters aspires to be a writer and had been writing play scripts for at least five years. All of this was lost in the fire. The mother was inspired by her daughter to participate in the 2020 Census because she felt that the federal dollars to support her daughter’s Chinese Immersion school, would help her daughter achieve her goal of becoming a playwright.

2) One of our City outreach workers related a conversation she had with a resident in a food pantry line. When asked if she had completed here census survey, the woman looked gravely at the worker, saying that the census had nothing to do with her. Eventually, the resident started sharing intimate stories about her life and her journey to the United States, shared hardships as immigrants. The worker and resident spent more time talking about how it matters to complete the census and eventually, the resident completed her census.

3) A patient brought an older version of a census flyer (before the end dates changed) to the clinic asking if the City helped patients complete the Census. The patient was confused about the deadline, after hearing on TV that the deadline was the end of October, but heard elsewhere that the deadline was September. Staff gave the patient the correct information and they filled out the census at home.

4) A family (husband and wife) stated that they were in the process of sponsoring another family’s immigration and did not want to complete the census for fear of interfering with that process. A City census worker explained that filling out the census form would not jeopardize the process and completed their census online using the worker’s tablet.
5) At events in Civic Center Plaza and the Bayview, several seniors in their late 70s and 80s told a census volunteer that this was the first time they had completed a census survey.

6) During the bus caravan stop in the Mission, a senior man in a wheelchair proudly told the Executive Director that he had completed his census form and thanked the Complete Count Committee members who had stopped to ask him how he was doing. He said he had cancer and was very vulnerable but was happy to do his part to support hospitals, social services and his community.
9) **Please add any suggestions for the 2030 Census efforts, including timelines.**

a. In the development of outreach strategies and materials, try to understand and engage in a culturally competent way with hard-to-count populations. This includes developing materials and images that accurately reflect the targeted communities (not stock images), hiring outreach workers with experience working with hard-to-count groups, and engaging communications firms with experience successfully matching tactics with target local audiences.
b. Train community-based organizations on the census process six months in advance of the availability of questionnaires on what to expect when US Census Workers start their operations.

c. Identify area organizers that encompass more than community-based organizations- close coordination between the US Census Bureau, State and local municipalities is key to avoid duplication, redundancies, and waste of resources.

d. Engage community partners and develop a statewide plan and communication strategy early on. Do not duplicate ads and images created by the US Census Bureau- develop a “We are California” campaign.

e. Make every effort to ensure that, if a pandemic or public emergency occurs, public health measures and protocols are already established to keep residents, workers and volunteers safe. This includes educating US Census Bureau workers about respecting and complying with local health orders.

Attachments

10) Please confirm that you have submitted the following which will help us better understand the full breadth of the Census work and achievements.

a) SwORD uploads of completed activities-yes

b) Updated list of subcontractors- yes

c) Evaluations or analytical reports, if any- yes

d) Sample products*- yes

SF COUNTS MESSAGING TOOLKIT
FOR CENSUS GRANTEE PARTNERS

AUTUMN 2019: EDUCATION PHASE

Revised: with multilingual messages
ABOUT SF COUNTS

The City and County of San Francisco (the City) is fully committed to ensuring that every San Francisco resident is counted in the 2020 Census. The City’s SF COUNTS collaborative campaign is based on the belief that a successful count in San Francisco is only possible if the approach is community-driven, grassroots, culturally-competent, and reflective of San Francisco’s diverse populations. SF COUNTS is a campaign of the SF Office of Civic Engagement & Immigrant Affairs.

ABOUT THIS TOOLKIT

SF COUNTS is committed to removing barriers to ensure every San Francisco resident is informed, engaged and motivated to participate and be counted in the 2020 Census. As an OCEIA grantee partner, we believe you are a trusted messenger who knows the communities you serve best. Use this toolkit to help guide your best practices on messaging the importance of participating in the 2020 Census to your constituents.

On the road to the 2020 Census, we are in the education phase (August-December 2019) of messages to community.

In this toolkit, you will find:

1. A list of national, state and local resources for sharing information about the 2020 Census with your community. Take advantage of the information that already exists! Please utilize these fact sheets and resources for your organization’s own educational outreach. We recommend creating a communications plan with relevant staff in your organization.

2. Recommended social media accounts to follow! These accounts are sharing content on the 2020 Census already. Share their content, borrow messaging or learn best practices for digital engagement!

3. SF COUNTS campaign sample messaging and social media graphics to post and share from your organization’s social accounts, newsletters, emails and more!

SF COUNTS is a campaign of the SF Office of Civic Engagement and Immigrant Affairs (OCEIA).
RESOURCES

National

Census Bureau

- Fact Sheets
- Infographics & Visualizations
- Census Bureau Photos
- 2020 Census at a Glance

The Census impacts our children’s future

Census data helps get the health care, transportation, schools, affordable housing, and higher education that our children need to lead healthy and successful lives.

Access and download ALL SF COUNTS graphics here

SF COUNTS is a campaign of the SF Office of Civic Engagement and Immigrant Affairs (OCEIA).
Below are SF COUNTS campaign sample messaging to post and share from your organization's account. OCEIA will be posting these over the course of September-December 2019, and your organization can also share from our accounts.

Please note, the square graphic (800 x 800 px) is best used for Facebook and Instagram posts, while the rectangular graphic (1024 x 512 px) is ideal for Twitter. Access and download ALL SF COUNTS graphics here.

These sample messages mirror the same content reflected in the graphics. Organizations are encouraged to modify and customize messages that would better speak to their constituents and communities.

Sample Messages for Twitter, Facebook and Instagram

Did you know Census data helps get the health care, transportation, schools, affordable housing, and higher education that our children need to lead healthy and successful lives? #SFCounts #2020Census

The Census has real results for all of us. When you participate in the Census, you do your part to make sure federal dollars $$$ go to local hospitals, social services, affordable housing, transportation and so much more. #SFCounts #2020Census

Do you want your voice heard? Participating in the Census is an important way to make sure that you, your family and [San Francisco or insert specific neighborhood/community here]’s voice is heard by our leaders. #SFCounts #2020Census

Did you know Census data is used to determine not only federal funding for programs and services here in San Francisco, but also your equal representation in government? Get your voice heard, and spread the word about the #2020Census today! #SFCounts

The Census gets San Francisco resources for the next 10 years! This includes funds $$$ for programs that help students like: Title 1, Special Education grants, Pell Grants, Head Start, and other critical educational programs. #SFCounts #2020Census

Filling out the Census is a way to make sure your family and community is counted, heard, and visible: in Congress, elections, and local services and programs. Let your community know that the #2020Census is coming! #SFCounts

Did you know that filling out your Census form helps San Francisco get funds $$$ for local transportation, health care, schools, affordable housing, and higher education that have REAL benefits for our community. #SFCounts #2020Census

SF COUNTS is a campaign of the SF Office of Civic Engagement and Immigrant Affairs (OCEIA).

1.

Did you know Census data helps get the health care, transportation, schools, affordable housing, and higher education that our children need to lead healthy and successful lives? #SFCounts #2020Census

您是否了解人口普查數據能幫助獲取健康護理、交通、學校、可負擔房屋以及高等教育等方面的撥款，讓我們的兒童過上健康而成功的人生？#SFCounts #2020Census

¿Sabías que los datos censales ayudan a nuestros niños a recibir el cuidado de salud, transporte, escuelas, vivienda asequible y educación superior que necesitan para vivir una vida exitosa y saludable? #SFCounts #2020Census

Alam nyo ba na ang Sensus data ay nakakatulong sa pagkuha ng pangangalaga sa kalusugan, transportasyon, mga paaralan, abot-kayang pabahay, at mataas na paaralan na kailangan ng ating mga kabataan upang mamuhay ng malusog at matagumpay? #SFCounts #2020Census

Знаете ли вы, что данные переписи помогают получить медицинскую помощь, транспорт, школы, доступное жилье и высшее образование, которое необходимо нашим детям для здоровой и успешной жизни? #SFCounts #2020Census

SF COUNTS is a campaign of the SF Office of Civic Engagement and Immigrant Affairs (OCEIA).
2. The Census has real results for all of us. When you participate in the Census, you do your part to make sure federal dollars $$ go to local hospitals, social services, affordable housing, transportation and so much more. #SFCounts #2020Census

人口普查擁有我們所有人的真實普查結果。您參與人口普查，做好自己的部分，有助於確保聯邦的資金撥往本地醫院、社會服務、可負擔房屋、交通以及更多方面。#SFCounts #2020Census

El censo nos ofrece resultados concretos a todos. Cuando participas en el censo, haces tu parte para asegurar que los fondos federales $$ vayan a los hospitales, servicios sociales, viviendas asequibles, transporte y mucho más en tu localidad. #SFCounts #2020Census

May totoong epekto ang Sensus para sa ating lahat. Ang pagsali ninyo sa Sensus ay nakakatulong sa paninigurado na mapunta ang pederal na pera sa lokal na ospital, serbisyon panlipunan, abot-kayang pabahay, transportasyon, at iba pa. #SFCounts #2020Census

Perепись имеет реальные результаты для всех нас. Когда Вы участвуете в переписи, Вы вносите свою долю, чтобы убедиться, что федеральные доллары $$ идут в местные больницы, социальные услуги, доступное жилье, транспорт и многое другое. #SFCounts #2020Census

3. Do you want your voice heard? Participating in the Census is an important way to make sure that you, your family and [San Francisco or insert specific neighborhood/community here]'s voice is heard by our leaders. #SFCounts #2020Census

您是否希望您的聲音能被聽到？參與人口普查是一個重要的途徑，可確保我們的領導者能聽到您、您的家人以及三藩市的聲音。#SFCounts #2020Census

¿Quieres que te escuchen? La participación en el censo es una manera importante para asegurar que tú, tu familia y la voz de San Francisco la escuchen nuestros gobernantes. #SFCounts #2020Census

Nais ba ninyong mapakinggan? Ang pagsali ninyo sa Sensus ay mahalagang paraan para siguraduhin na tayo, ang pamílya natin, at ang bose ng San Francisco ay napakikinggan ng ating mga pinuno. #SFCounts #2020Census

Вы хотите, чтобы Ваш голос был услышан? Участие в переписи является важным способом убедиться, чтобы Ваш голос, голос Вашей семьи и голос [ Сан-Франциско или or insert specific neighborhood/community her] был услышан нашими лидерами. #SFCounts #2020Census
4. Did you know Census data is used to determine not only federal funding for programs and services here in San Francisco, but also your equal representation in government? Get your voice heard, and spread the word about the #2020Census today! #SFCounts

5. The Census gets San Francisco resources for the next 10 years! This includes funds $$$ for programs that help students like: Title 1, Special Education grants, Pell Grants, Head Start, and other critical educational programs. #SFCounts #2020Census
